Behavioural, logical, and functional aspects of change

Business logic

Code behaviour

Design decisions

Architecture

Features

Functionality

Implementation

Solution / Approach

Business Logic questions

discussing code placement and behavior

How the code works

discussion of the intention and design

1 about a particular design decision

1 looking at previous code, 2 discussion regarding the design pros and cons

Design decisions, 2

architecture

coding style, architectural decisions

architecture, questions, grammar mistakes

Feature or issue

Feature request

Feature requests

new features or discussions about them, 30

New features and implementation

1 - implementation of functionality

functionality content

embedded binary size

Functional duplication

Functionality

2 - functional clarifications

Implementation

Implementation

6 other implementation details

Solution / Approach

Discussions about optimal solution

Solution discussion

problem solving approach

Solution Discussion 5

Approach

Merits about all things and all the pros and cons about the approach

Compatibility

Backend compatibility

API backwards compatibility

Backwards compatibility

Dependencies

2 about style or dependencies, 1 thinking for the contribution

Automated dependency approval

Has it been tested (3)

integration issues

CI / Build / Test

Has it been tested (3)

Bugs / defects

42 - nitpicks

Several small nitpicks (e.g. typos in comments)

Small bugs

mostly new features related to missing api docs

5 or more, focused nitpicks on what API we should expose

mostly about api design and all the pros and cons about the approach

Maintainer indicated their fault

API

Has it been tested (3)

Urgency of the issue

Switching the branch

Fixing other issues
